Job Description:

We are seeking a certified Scrum Master to join our team in support of the CDC ISS DME - Public Health Surveillance Systems. We have a team of about 15 people working together to build and enhance several applications with strong backend data verification capabilities running on SQL server and other newer technologies.

In this role, you will be the scrum master supporting the development of public health surveillance systems.

Position is for full time employment with CSRA and will be based at our Atlanta, GA office on Corporate Square. You can work a flexible schedule Monday - Friday around core business hours with the opportunity to telework 1 day a week once established and with manager approval.

RESPONSIBILITIES AND DUTIES:

- Serve as the Scrum Master – track backlog of tasks, ensure on task with sprints, organize sprint planning meetings for multiple initiatives and multiple applications each running 3 weeks sprint and releases approximately once every 2 months.
• Review and remove roadblocks to ensure timelines and deliverables are on target
• Draft system process flows
• Assist in performing QA of systems.
• Utilize knowledge of computer system capabilities, business processes, and workflow.
• Ensure tasks are being completed in a timely manner (aligned with sprints)
• Use JIRA and TFS to track status updates and create status reports
